Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

This Office Action is in response to amendments and remarks filed April 30, 2004. Claims 1-3 and 5 are currently pending.

Claim Objections

1. Claims 1-3 and 5 are objected to because of the following informalities:

Regarding claims 1 and 2, "the connection" lacks proper antecedent basis.

Regarding claims 3 and 5, it is unclear how the fibers are connected "by using" the method of claim 1. The method of claim 1 fails to set forth a connecting step.

Claims 3 and 5 also fail to set forth any connecting steps "for connecting."

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 5, as understood, are rejected under 35 U.S.C. 102(b) as being anticipated by Tokumaru et al. (U.S. Patent 5,611,015).

Regarding claims 1-3 and 5, Tokumaru et al. disclose (see Figs. 2-4) a method of estimating an amount of angular disagreement of planes of polarization between two polarization-maintaining optical fibers in which at least one of the fibers has a pair of stress applying sections (2c), comprising the steps of: irradiating a light (3) on the lateral side of the fibers during or after a connection of the fibers; and estimating the amount of

angular disagreement of the plane of polarization of the fiber having the stress applying sections from a function of positions (see Fig. 12) and heights (see Fig. 12) of two peaks of brightness (2p, 3p) corresponding to the stress applying functions of a transmitted light produced by irradiating the light. A function of the heights of the peaks is inherently taken into account in the estimation. That is, by definition, a “peak” is a part of a signal or curve that is higher than other parts of the signal or curve. And in order to determine if a part of the signal or curve is a peak, heights would have to be compared. Tokumaru et al. also disclose fusing the fibers.

Response to Arguments

4. Applicant's arguments with respect to claims 1-3 and 5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
